

**SEStran RTPI Update**  
**13 May 2008**

The proposed Phase 1 RTPI project will equip a number of bus operator depots. The Feasibility Report gives examples of the bus routes which can be covered from these locations. The following important routes can also be covered from the proposed depot locations:

- First service 38 - Stirling to Edinburgh,
- First service 43 - South Queensferry to Edinburgh,
- Stagecoach express services X24, X26/7, X50, X59/60 and X54/57,
- First services 62/62A/62B - Galashiels to Edinburgh,
- Munroe's services 51, 52 and 308 group services,

Note: the proposed services are indicative and will be subject to review once tenders are returned. The implications of any budgetary constraints or intervening bus service changes can then be fully considered.
