

## **Low Emission Zones Consultation**

### **1. INTRODUCTION**

- 1.1** In November 2015, the Scottish Government published the Cleaner Air for Scotland (CAFS) Strategy<sup>i</sup>. CAFS is a national strategy which sets out how the Scottish Government and its partner organisations propose to reduce air pollution to fulfil Scotland's ambitious carbon reduction targets. Amongst the policy areas that are outlined within CAFS, the National Low Emissions Framework<sup>ii</sup> (NLEF) is cited as an important initiative, alongside the National Modelling Framework, adoption of World Health Organisation Guidelines, and proposals for a National Air Quality Awareness Campaign
- 1.2** CAFS also describes how the Scottish Government would enable local authorities to appraise, justify the business case for, and implement a range of, air quality improvement options related to transport and associated land use. In addition, the Scottish Government's "A Plan for Scotland 2016 -17"<sup>iii</sup> is committed to, with the help of local authorities, identifying and putting in place the first Low Emission Zone(LEZ) by 2018. The concept of LEZs has been established for some years. An LEZ involves a city or local authority setting vehicle emissions limits in defined areas where poor air quality is an issue. Any vehicles which do not meet the required LEZ standard are restricted or deterred from entering the area concerned, either by exclusion (full or partial) or by charging.
- 1.3** Much work has already taken place on building the evidence for Low Emission Zones, with detailed work on the new National Modelling Framework (NMF) to provide key evidence, and strong progress on developing the NLEF, to deliver guidance on business case development and delivery. In addition, a wide range of consultation and engagement with key stakeholders on the delivery challenges of LEZs has taken place. Due to the complex nature of delivering Low Emission Zones, and some of the concerns that were raised by stakeholders in relation to this, Transport Scotland are taking forward a consultation to support the early adopters in their work, and to finalise a guidance document.

### **2. CONSULTATION**

- 2.1** The CAFS Strategy has seen the establishment of a Governance Group with wide ranging representation, to oversee its progress. The group consists of

several subgroups focusing on specific topics, and now wishes to receive further input from other Stakeholders.

- 2.2** It invites views on how the Scottish Government can, with the help of local authorities, identify and put in place the first new LEZ by 2018, creating a legacy on which other areas can build.

### **3. CONCLUSIONS/RECOMMENDATIONS**

- 3.1** SEStran welcomes this opportunity and is keen to encourage the first LEZ in Scotland to be implemented within the SEStran Region. Officers will provide a verbal update at the meeting.

Lisa Freeman

**Strategy and Projects Officer**
