A quick video overview of Thistle Assistance

Thistle Assistance: Your Travel Companion

How Thistle Assistance works

We all welcome a little extra assistance now and again, particularly when travelling alone. Thistle Assistance is an initiative to help you feel safer and more comfortable when using public transport.

You may prefer more time to get to your seat. You may like your driver to speak more slowly and clearly. Thistle Assistance's card and app let transport staff know in an easy and subtle way what extra support you'd like.

Where you can use it

The Thistle Assistance card and app are recognised by many public transport operators across Scotland, from buses and trains to planes and ferries. Simply show your personalised card or app to their staff and they will understand what additional assistance you require.

Card and app benefits

The Thistle Assistance card and app are free to use for anyone who needs it. Use the card for one journey or purpose, or use it every day: it's adaptable and disposable.

The card and app symbols and instructions encompass a range of disabilities and impairments. They are also useful during pregnancy, or if you have temporary mobility issues, when some extra thought and care are appreciated.

Sometimes, using public transport

Thistle Assistance Card

The Thistle Assistance card

The Thistle Assistance card is designed to fit in your purse or wallet along with your credit and loyalty cards.

As it's purely an information card, Thistle Assistance is free to everyone and comes with stickers to allow you to personalise how you use it. Symbol stickers indicate your type of disability or impairment, while short message stickers provide read-at-a-glance information for transport staff about the help you require.

An information leaflet outlines how to get the most from your card. And if your circumstances or requirements change, simply request or acquire a new card to reflect your current or changing needs.

You can now also add a sticker message if you are exempt from wearing a face covering. See more info over at our [travel safety page](#).

Thistle Assistance Card

Thistle Assistance App

The Thistle Assistance App

Add the Thistle Assistance app to your smartphone or mobile device so it's always there when you need it. As it's solely an information app, Thistle Assistance is free for everyone to use.

Before travelling, select the symbol which best reflects your disability or impairment and add a message to highlight the help you need to show to transport staff. It's as simple as that. You can update or change the details you show at any time to reflect your personal circumstances.

You can now also add a message if you are exempt from wearing a face covering. See more info over at our [travel safety page](#).

Thistle Assistance COVID-19

COVID-19 Response

- ✓ Created an 'exemption' message for Card & App
- ✓ Updated the website with a COVID specific page in line with Scottish Government advice
- ✓ Developed promotional material
- ✓ Put in place a direct mail service for requests received via website & dedicated phone line.
- ✓ 20,000 cards sent out directly to the public and over 5,000 downloads of the App since March 2020.

If you are exempt from wearing a face covering on public transport, the Thistle Assistance card and app is an easy way to let the transport staff know.

Further development

We know many people struggle to use public transport.

There is a even wider spectrum of need, perhaps beyond travel?

Mobility, communication and anxiety are still the main barriers – but even more so post COVID?

solutions.

VoyagAR Platform

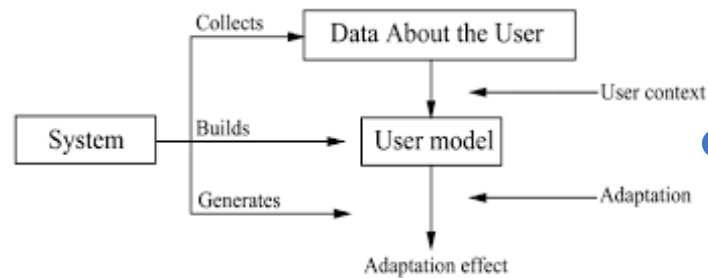

Using Artificial Intelligence - Examples

Modify Route based on external factors. Eg. Crowded bus – delay user until next bus.

Adaptive interface and routes based on user impairments and preferences

Routes generated based on learned knowledge sourced from users, carers and crowdsourcing. Eg. Negative reports on a route – identify reason and extrapolate.

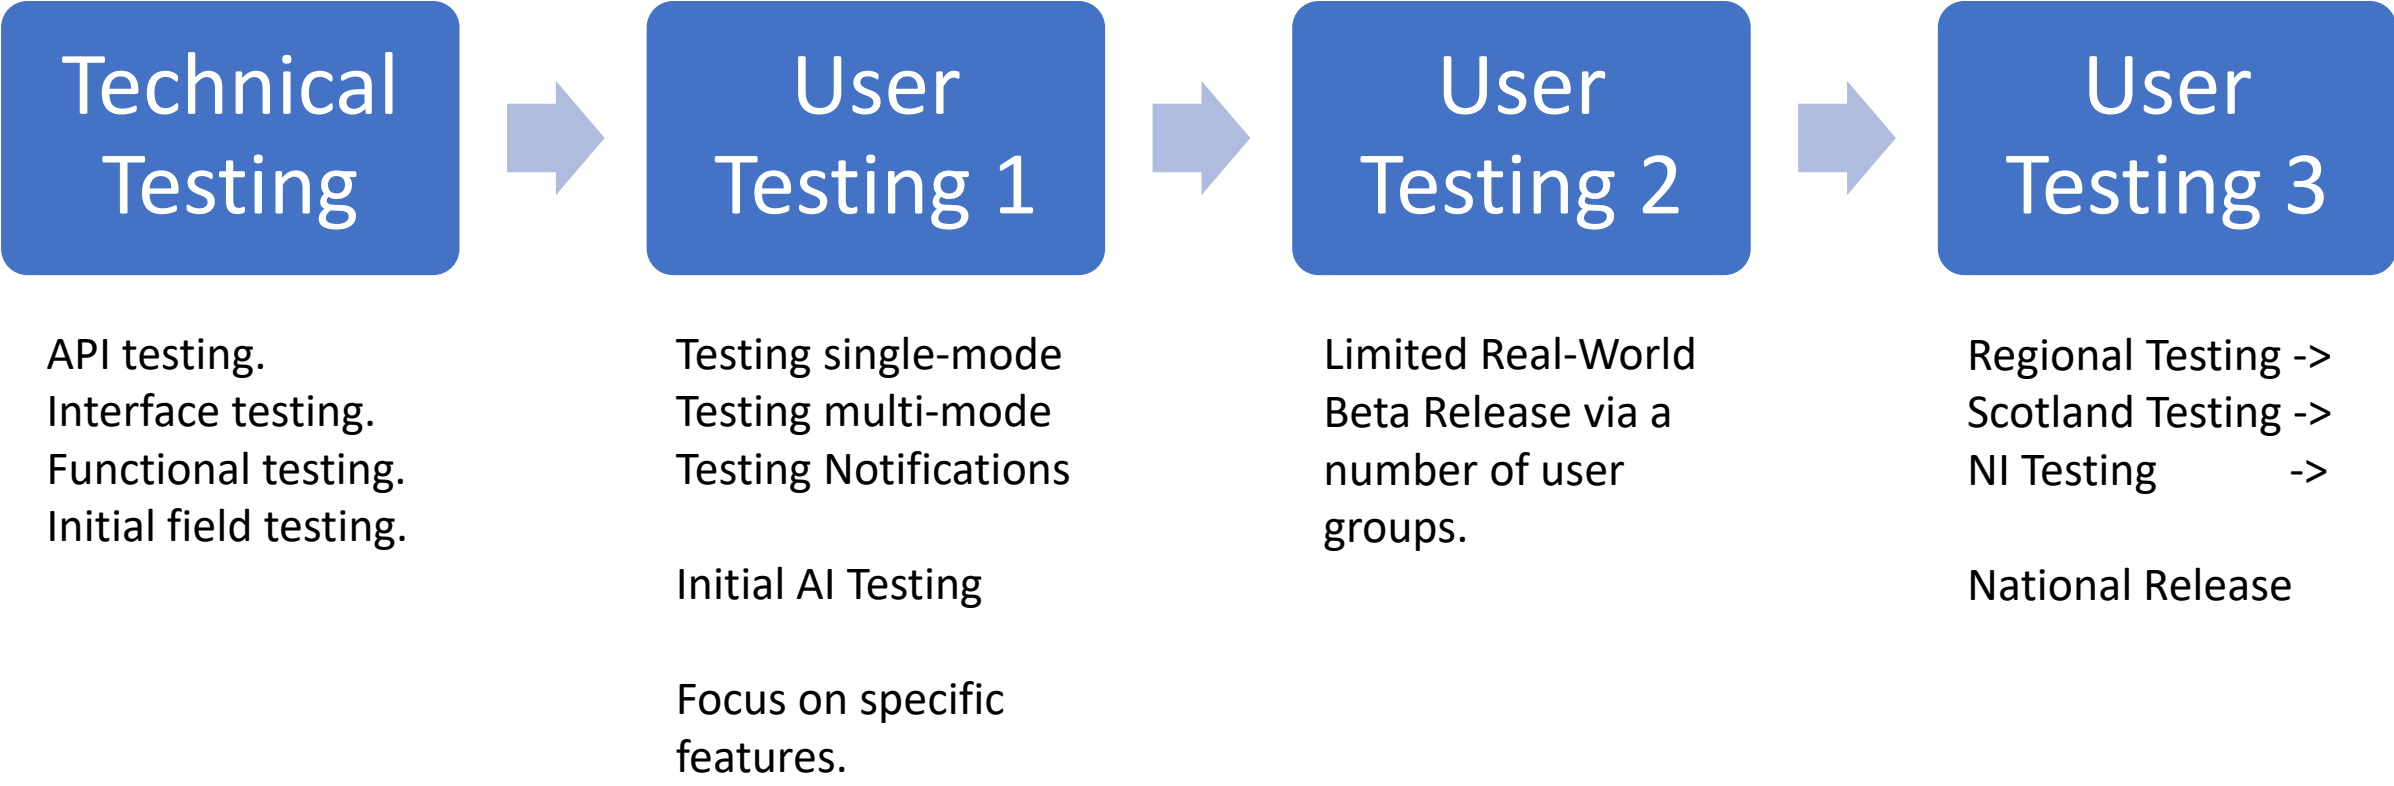

Socialised routing – ensure users are not separated from friends and peer groups.

Identify and recommend facilities relevant to the user's disability – both enroute and at destination.

Testing

Summary

Take best-of-breed solutions
Consolidate into a single service

Use Artificial Intelligence to produce a simple personalised solution specific to the needs of the user

Deliver a simple adaptive interface that links seamlessly and dynamically with the environment
and creates a protective bubble around the user

Commercialise by delivering a new market to existing commercial entities

The background is a solid teal color. It features several stylized, light blue cloud shapes of various sizes scattered across the upper half. In the top right corner, there is a small white airplane icon flying towards the right. Along the bottom edge, there are white icons representing ground and sea transport: two buses on the left and a ship on the right. The word "Thanks" is centered in the middle of the image in a purple, sans-serif font.

Thanks
